

Senior Architectural Designer

Position Description: TPH Architects is seeking a full-time designer/architect to join our team. Applicant should be comfortable working with clients and other design team members on a variety of project types including: K-12, commercial, residential, new construction, and renovation projects.

Primary Responsibilities:

- Leading a project team through planning and design.
- Illustrating design concepts, both via hand sketches and computer rendering, especially during the schematic design phase.
- Presenting design concepts both to the design team and to clients.
- Gathering technical documents for the construction document phase.
- Supporting marketing efforts through illustrations or interview panels.

Experience:

- 10+ years in all stages of design.
- Minimum 2-year architecture degree.
- Licensed architect is preferred.
- Experience with K-12 education projects - both new construction and renovation projects - strongly preferred.
- Familiar with all construction types, current building codes and ADA regulations.

Skills:

- CAD proficiency; Revit and rendering experience are preferred.
- Strong graphic, conceptual, and design skills.
- Ability to create new ideas both independently and in collaboration.
- Ability to communicate ideas in a variety of graphic media.

Benefits:

- Paid vacation & sick time.
- Medical insurance options for employee + family (fully funded by company).
- SEP/IRA (fully funded by company).
- Dental & life insurance.
- Salary to \$110k.

TPH Architects is an equal opportunity employer.
